- Paper Insert Door Plate
- Combo Paper Insert Door Plate
- Engraving Laminate Door Plate

These products are ideally suited for use in offices, hospitals, universities and similar organisations. They are typically located on doors or walls. The Multi-Panel door plate can also be used as a small directory. The larger sized door plates may also be used as directional signs. The Paper Insert door plate allows the user to print names in-house and is perfect for use in hospitals as above bed patient identification labels or office workstations where names are continually changing.

A number of mounting brackets are available which clip directly onto office workstation furniture. The Pigeon Hole plates are designed to accept 12mm self adhesive label strips printed by any make of electronic label machine commonly available at stationers.

This family of signs have a similar common feature, that is a metal back plate onto which the face plate is attached by means of a magnetic strip. This is a very simple and effective way of mounting the face plate – it avoids the use of plastic clips and end pieces which, over time, can break or get lost. They are interchangeable, slim line and compliment modern interior fit out design.

Dernier Series Door Plate

The Signlink 110 Dernier Series door plate is an easy to install, cost effective, interchangeable or permanent door sign. The simple design is comprised of a name plate with a magnetic strip on the back which attaches to a fixed mounting plate. The Dernier Series Door Plate appears on the door as a thin slimline aluminium plate with no visible fixings. The name plate will not move or rattle when the door is opened or shut because the magnetic strip holds it firmly in place, however should you need to change the name plate you simply remove the old one and replace it with any name plate of the same size. If you wish to make the sign permanent simply replace the magnetic strip with double sided tape. The Dernier Series Door Plate can also be fitted with brackets which enable them to clip onto work station furniture. Standard finish is **Satin Natural Anodised**.

Available in heights of 25mm, 30mm, 42mm, 50mm, 84mm, 100mm & 125mm.

Door Plate With Slider

This sign has a sliding cover plate which covers half of the message on plate behind it. The sliding plate enables the user to display two different messages. As you slide the cover plate across you cover one of the messages leaving only the intended message visible (e.g. Vacant / In Use). Alternatively the door plate may only have one message making the sign blank when the sliding plate is covering it. The lettering may be vinyl or engraved however it is recommended that engraving and paint filling the lettering would increase the life span of the sign considering the wear factor of the slider.

Combination Paper Insert

The Signlink Dernier Series Combination Paper Insert Plate has been specifically designed as a work station name plate. It is a combination of the Dernier 110 Series Door Plate and the Dernier 120 Series Paper Insert Name plate which are then held together on a single back plate. The top panel usually carries a company logo and is suitable for vinyl, engraving, screen printing or mechanical etching. The bottom panel accepts a paper name strip, usually with an employees name on it.

Paper Insert/Engraving Laminate Door Plate

The Signlink 120 Dernier Series Paper Insert Door Plate is an easy to install, cost effective, interchangeable door sign. The simple design is comprised of a name plate which allows for a paper insert and a polycarbonate cover strip to slide in. Alternately you could insert one of the many available engraving laminates with finishes from wood grain to marble. It has a very slimline appearance with no visible fixings. Should you need to change the name plate you simply remove the old one and replace it with another paper insert with the new name printed on it. Name plate lengths match standard A4 & A5 paper so inserts can be done on an office printer. The Dernier Series Paper Insert Door Plate can also be fitted with brackets which enable them to clip onto work station furniture.

Combination Slider

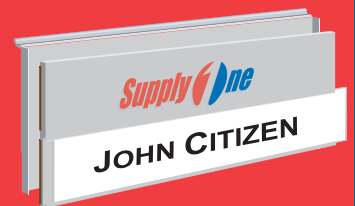

This Door Sign is comprised of two elements. The Top panel is a standard "Dernier" series door plate and the plate mounted beneath has a sliding cover plate which covers half of the lower mounted plate. The sliding plate enables the user to display two different messages. As you slide the plate across you cover one of the messages leaving only the intended message visible (e.g. Vacant / In Use). Alternatively the door plate may only have one message making the sign blank when the sliding plate is covering it.
