

Portable Sign Frames

These sign frames are ideal where signage is needed for only part of day or night. The portability of the frame allows the client to increase the advertising exposure of the business. Larger models can have wheels affixed to help with mobility.

Colourbond 'A' Frame

This "A" Frame is the most sturdy of the models available. The solid construction makes it suitable for outdoor areas. The colourbond panels can accept vinyl or can be painted on directly. This style of "A" is more suited, but not restricted, to a permanent sign.

Available in 2 sizes

600mm (wide) x 900mm (high)
900mm (wide) x 1200mm (high)

It is recommended that the larger of the colourbond "A" Frame be fitted with wheels to help with mobility. Wheels are sold separately, see below.

Coreflute Insert 'A' Frame

This "A" Frame is much lighter and best kept out of high wind areas. The coreflute insert slides easily in and out of the frame making the changing of signs extremely easy. This also means that the signmaker does not need to take the "A" frame to the workshop to create the sign, they simply replace the coreflute insert once the new sign is made so the client is never without their signage.

Available in 2 sizes

600mm (wide) x 900mm (high)
900mm (wide) x 1200mm (high)

It is recommended that the larger of the colourbond "A" Frame be fitted with wheels to help with mobility. Wheels are sold separately, see below.

'T' Frame

This "T" Frame is constructed from a sturdy steel tubing making it suitable for outdoor areas. The colourbond panels can accept vinyl or can be painted on directly.

Available in 2 sizes

600mm (wide) x 900mm (high)
900mm (wide) x 1200mm (high)

It is recommended that the larger of the colourbond "T" Frame be fitted with wheels to help with mobility. Wheels are sold separately, see below.

Wheels

Rubber tyre with ball bearing action easily fitted to any of the frames to assist with mobility. Especially useful for the larger frames where weight becomes an OH&S issue.
